

July 15th, 2018

This letter is to inform you of my intent to file another federal suit against you if you do not cease and desist from fraudulently claiming to be a "victim" in case number 15F5736. Enclosed please find a photocopy of page one of the official transcript of my private, Confidential conversation with Dep. Attorney General John M. Feser. If you had ever bothered to read this transcript you would already know that there is not one single criminal threat in the entire 11 page transcript. I am only sending you a copy of page one only for two reasons; one is because you have access to the entire transcript and two is because the only time your name is mentioned is on page one, mentioning someones name during a general screed against law enforcement does not make a criminal threat. Likewise, it is not a criminal threat to say you are going to "tell people what Edwards did to me, tell people what Jackson did to me, tell people what Gonzalez did to me." I am giving you fair legal warning: Just because your department falsely arrested me before ascertaining the complete facts and just because neither your department nor the District Attorney wants to admit it made a mistake, does not mean that your on-going participation in this false prosecution will not lead to your prosecution for Slander, Civil Harassment, fraud, invasion of privacy and malicious prosecution. My sincere suggestion is that you immediately sever yourself from this false and malicious prosecution or consult an attorney for an independent legal opinion regarding any liability you may face for your participation in it.

Sincerely,
Robert A. Gibbs
